

C

Might appear to have a lack of interest in social interaction	He won't talk to other kids. Will step away. Sit by himself.	Talk to him. Ask him to come over to the interaction area. Give him a "job" to do.	If he doesn't respond, leave him alone and ask him again at a later time.
Might have difficulty with pragmatically and social uses/ social cues for language	We're working on it all the time.		
Might have limited joint attention	Will not change direction or attention to what you want him to do	Just talk to him and redirect him	
May show atypical patterns of speech	He has speech and language delay		
Could be "overactive" or "under-active"	Too excited and loud or doesn't show interest.	Engage him as much as you can. Just because he's not showing interest doesn't mean he's not paying attention.	
Might have restricted interests			
Might resist changes in routine	Doesn't follow directions.	Encourage, invite, remind him of what you're doing. Tell him what's going to happen before it happens.	
May have challenges with anxiety	Will chew on his necklace or pick on his shirt.		
Has difficulty expressing what they want or need.			
Difficulties in pretend play			
May have difficulty establishing friendships with kids the same age.
